Nyrion Aeon end of Feature support

The 10th of November will be the last day Nyrion Aeon will get official support from PingunixDevelopments. Because Nyrion Grain is almost the same. But for the people that want to stay on Aeon, there is an option.

The Developer Program (DP) will provide feature updates, bug fixes and other necessary updates until 1-5-2026. These patches will be uploaded on another Github repository. (https://github.com/PingunixDevelopments/Developer-Program)

After May 1st there will be no patches or features uploaded to Aeon. And you must make a choice to stay on Aeon or switch to another version.
